

Expressions

March 14, 2017 10:03 AM

① Translating Phrases into Algebraic Expressions

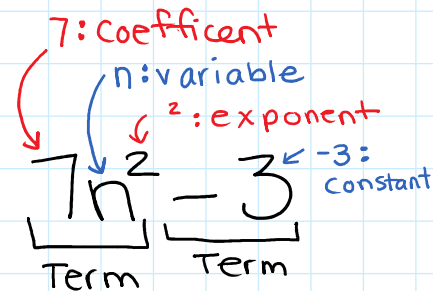

a. eight less than twice a number $2n - 8$

three fourths of a number increased by five sixths $\frac{3}{4}n + \frac{5}{6}$

c. double the ⁺sum of a number and three. $2(n + 3)$

② Collecting (or grouping) Like Terms

- ★ - look for "matching" variables
- coefficients can be different
- ★ - exponent must match

a. Identify the like terms

1. $7x$ $-y$ y^2 3 x $2x$ $7x^2$

2. mn n^2 $-n^2$ m^2 $3m$

3. $2x$ $2y$ $-x^2$ $3y$ $4y^2$

b. Collect like terms:

a. $3c + 4d - c + 2d$
 $3c - 1c + 4d + 2d$
 $2c + 6d$

b. $17z + 12a + L - 4z - 6a$
 $17z - 4z + 12a - 6a + L$

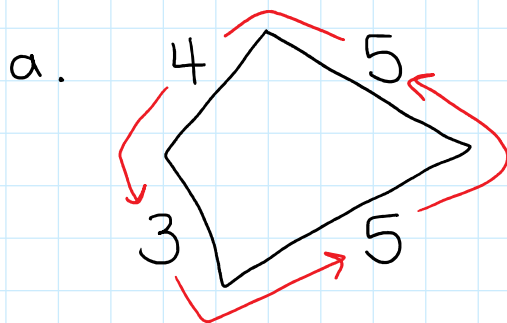

$$13z + 6a + L$$

c.
$$\begin{array}{r} \underline{-8f} + \underline{n} - \underline{2f} - \underline{n} \\ -8f - 2f + n - n \\ -10f \end{array}$$

d.
$$\begin{array}{r} \underline{9n} + \underline{3m} - \underline{2n} + \underline{7m} \\ 9n - 2n + 3m + 7m \\ 7n + 10m \end{array}$$

e.
$$\begin{array}{r} \underline{2x^2} - \underline{4x} - \underline{5x^2} + \underline{7x} \\ 2x^2 - 5x^2 - 4x + 7x \\ -3x^2 + 3x \end{array}$$

③ Find the Perimeter:

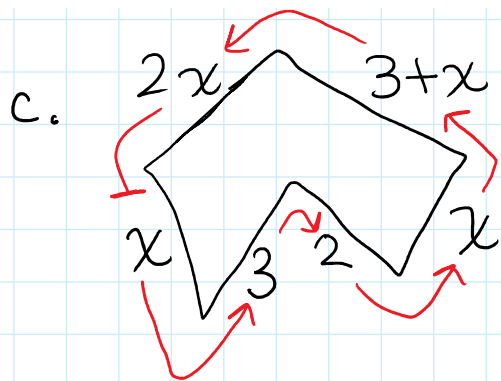

$$P = 4 + 3 + 5 + 5 = \textcircled{17}$$

$$P = 2n + 3n + 2n + n + n = \textcircled{9n}$$

$$P = \underline{x} + \underline{3} + \underline{2} + \underline{x} + \underline{3} + \underline{x} + \underline{2x}$$

$$P = \underbrace{x + 3 + 2}_{x+x+x+2x} + \underbrace{x + 3 + x}_{+3+2+3} + 2x$$

$$5x + 8$$

④ Distribution with Expressions

a.

$$3(n+2) \Rightarrow 3n+6$$

3 is "shared" with everything in the brackets!
 Multiplying aka distributing

b.

$$5(x+4) \Rightarrow 5x+20$$

c.

$$-2(7+m) \Rightarrow -14-2m$$

⑤ Substitution with Expressions

a. in $3n+2$ use $n=5$

$$3(5)+2$$

$$15+2$$

17

b. in $4f-6$ use $f=10$

$$4(10)-6$$

$$40-6$$

34

c. in $3x - 2y$ use $x = 5$ and $y = -3$

$$3(5) - 2(-3)$$
$$15 + 6$$

*double check
in your calc!
